

I worked in the resident units as an education support worker for three years, supporting young people in their education who were looked after by Southwark. Myself and the young people I worked with, thought that Face to Face is an excellent project. For one young person who started the project in the beginning of year nine and who had never attended mainstream school, the project enable him to get back into education and develop his ICT skills. He has done very well and is still attending and will be going into year eleven their. He works with the younger young people and has achieved so much from the staff.
